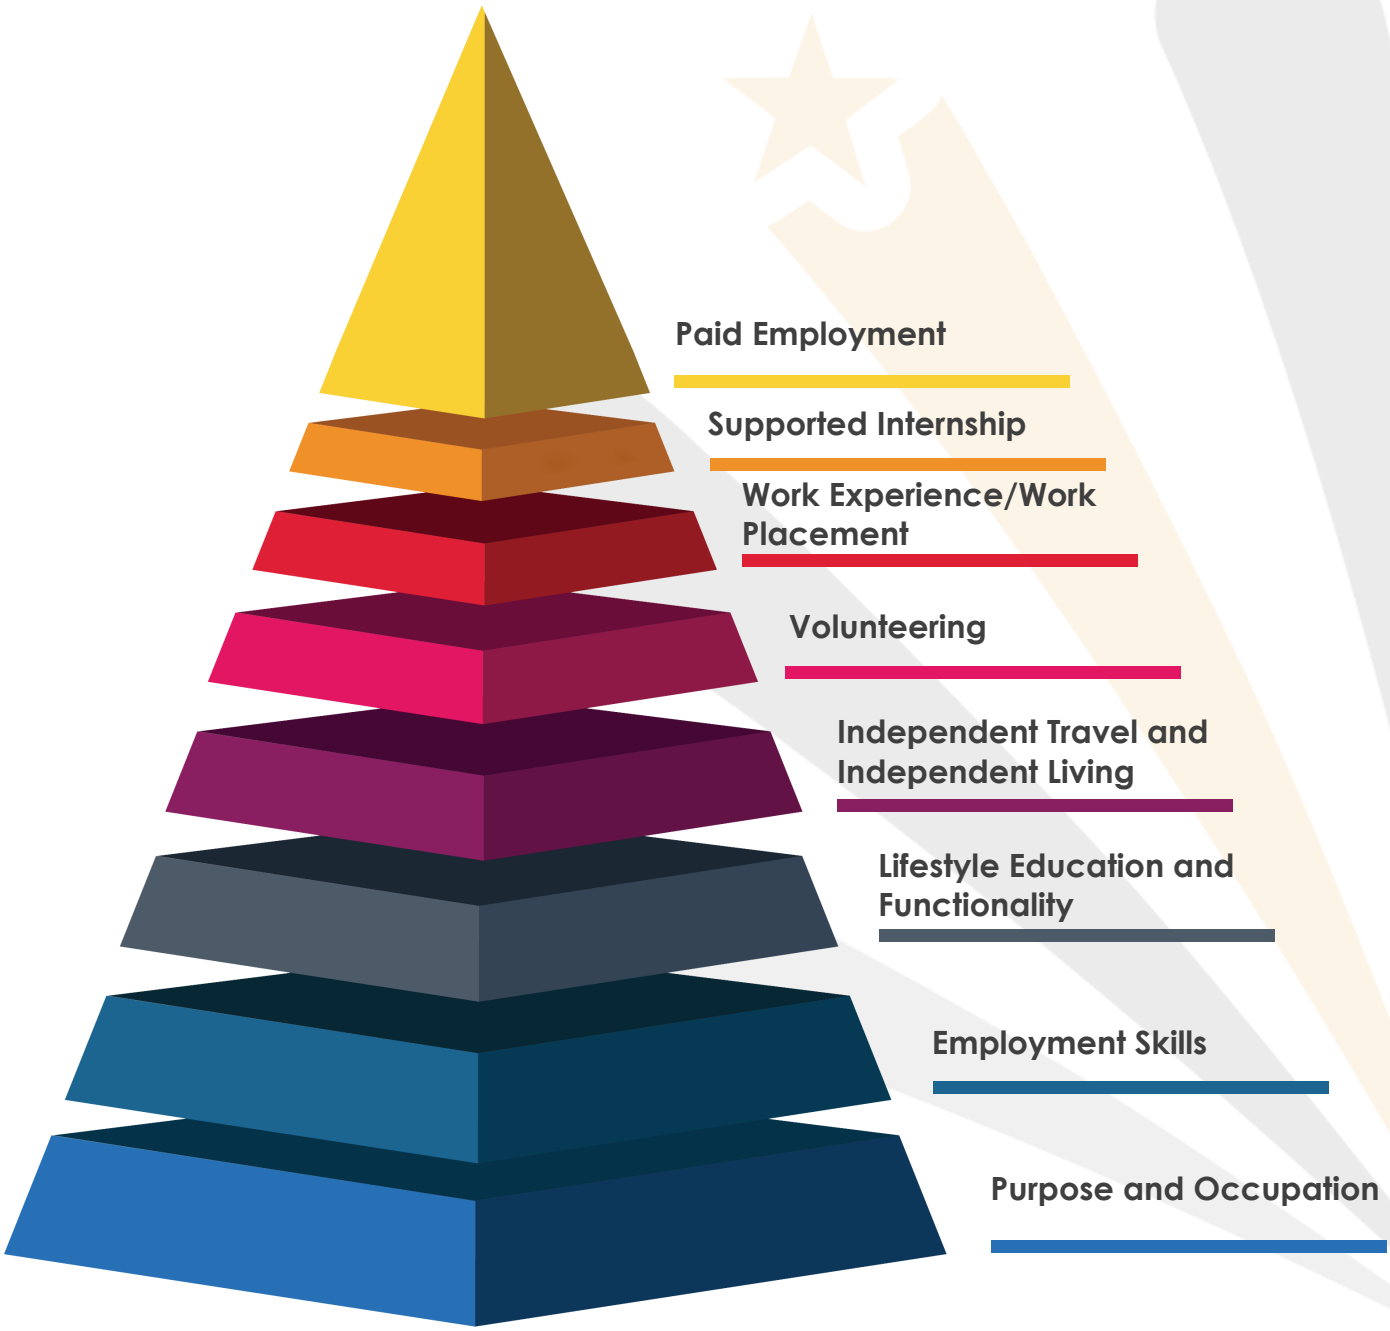
College

The Employment Pyramid

This pyramid was created by The Preparing for Adulthood Team (Darling, 2023)



We recognise that students learning journeys are unique and for this reason we do not put students on identified pathways.

However, we use the Employment Pyramid to help parents and staff understand where students are currently at on their personal journey and whether this meets their personal aspirations for the future. We can then identify strategies to support further.

This document is helpful at annual reviews and transition meetings.
